#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-104 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Burnstein (USP 6,268,716). Burnstein discloses the digital controller having a controller to the drive signals at the sampling frequency and to dynamically set a phase interval between each of the output phases. See figure below.

**FIG.\_4**

**FIG.\_10**

3. Claims 1-104 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Varga (USP 6,144,194). Varga discloses the digital controller having a controller to the

Art Unit: 2838

drive signals at the sampling frequency and to dynamically set a phase interval between each of the output phases. See figure below.

FIG. 4A

### ***Response to Arguments***

4. Applicant's arguments filed 10-18-06 have been fully considered but they are not persuasive. The amendment to the claims having the limitation of does not add anything further than what was originally claimed in the previous set of claims. The limitation "wherein the digital controller is adapted to selectively set the phase interval to one of greater than  $360/N$  or less than  $360/N$ , where  $N$  is an integer greater than 1." Given  $N$  to any normal counting number. The phase interval is always going to be between 0 and 360. The limitation does not further define or limit the phase interval.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
